22	Academy Bugs	Flamingo Shirt Product	HTTP 200 OK

Test Case Detail Specification — TC-AUTH-001

ID: TC-AUTH-001	Title: Verify User Login with Valid Standard Credentials	Priority: P1 - High	Type: Functional UI
Target Link: https://www.saucedemo.com			
Preconditions: User on login page.			
Test Execution Steps: 1. Enter standard_user. 2. Enter secret_sauce. 3. Click Login.			
Expected Result: User redirected to /inventory.html.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-AUTH-002

ID: TC-AUTH-002	Title: Verify Locked-Out User Login Exception Handling	Priority: P1 - High	Type: Negative UI
Target Link: https://www.saucedemo.com			
Preconditions: User on login page.			
Test Execution Steps: 1. Enter locked_out_user. 2. Enter secret_sauce. 3. Click Login.			
Expected Result: Error popup displayed: Sorry, user has been locked out.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-AUTH-003

ID: TC-AUTH-003	Title: Verify Empty Credentials Submission Validation	Priority: P2 - Medium	Type: Boundary UI
Target Link: https://practicetestautomation.com/practice-test-login/			
Preconditions: Fields empty.			
Test Execution Steps: 1. Click Submit button with blank username & password.			
Expected Result: Validation error message: Your username is invalid!			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-AUTH-004

ID: TC-AUTH-004	Title: Verify Password Field Character Masking & Security	Priority: P2 - Medium	Type: Security UI
Target Link: https://practice.expandtesting.com/login			
Preconditions: Login page open.			
Test Execution Steps: 1. Inspect password field DOM. 2. Type SuperSecret123!			
Expected Result: Type attribute is 'password'. Characters hidden as black bullets.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-AUTH-005

ID: TC-AUTH-005	Title: Verify Logout Session Teardown & Redirect	Priority: P1 - High	Type: Functional UI
Target Link: https://www.saucedemo.com/inventory.html			
Preconditions: User logged in.			
Test Execution Steps: 1. Open hamburger menu. 2. Click Logout sidebar link.			
Expected Result: User returned to login screen. Direct navigation to inventory blocked.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-AUTH-006

ID: TC-AUTH-006	Title: Verify SQL Injection Sanitization on Auth Forms	Priority: P1 - High	Type: Security
Target Link: https://practice.expandtesting.com/login			
Preconditions: Form ready.			
Test Execution Steps: 1. Input `` OR '1'='1' into username & password fields. 2. Click Login.			
Expected Result: Form rejects payload cleanly without exposing database stack traces.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-CART-001

ID: TC-CART-001	Title: Verify Single Product Addition to Shopping Cart	Priority: P1 - High	Type: Functional UI
Target Link: https://www.saucedemo.com/inventory.html			
Preconditions: User logged in.			
Test Execution Steps: 1. Locate Sauce Labs Backpack. 2. Click Add to cart button.			
Expected Result: Cart badge count updates to 1. Button text changes to Remove.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-CART-002

ID: TC-CART-002	Title: Verify Cart State Persistence Across Pages	Priority: P1 - High	Type: State Persistence
Target Link: https://www.saucedemo.com			
Preconditions: Item in cart.			
Test Execution Steps: - Navigate to product detail. - Return to inventory. - Open /cart.html.			
Expected Result: Cart retains Sauce Labs Backpack with quantity 1 and price \$29.99.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-CART-003

ID: TC-CART-003	Title: Verify Item Removal from Active Shopping Cart	Priority: P2 - Medium	Type: Functional UI
Target Link: https://www.saucedemo.com/cart.html			
Preconditions: 2 items in cart.			
Test Execution Steps: 1. Click Remove next to Sauce Labs Bike Light.			
Expected Result: Item removed from cart table. Badge updates from 2 to 1.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-CART-004

ID: TC-CART-004	Title: Verify Checkout Step 1 Mandatory Fields Validation	Priority: P1 - High	Type: Negative UI
Target Link: https://www.saucedemo.com/checkout-step-one.html			
Preconditions: On checkout step 1.			
Test Execution Steps: 1. Leave First Name blank. 2. Click Continue.			
Expected Result: Error message displayed: Error: First Name is required.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-CART-005

ID: TC-CART-005	Title: Verify End-to-End Order Submission Completion	Priority: P1 - High	Type: End-to-End
Target Link: https://www.saucedemo.com/checkout-step-two.html			
Preconditions: Valid info submitted.			
Test Execution Steps: 1. Verify order subtotal. 2. Click Finish button.			
Expected Result: Redirected to checkout-complete.html with THANK YOU FOR YOUR ORDER.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-CART-006

ID: TC-CART-006	Title: Verify Catalog Price Sorting (Low to High)	Priority: P2 - Medium	Type: Functional UI
Target Link: https://automationexercise.com/products			
Preconditions: Product list loaded.			
Test Execution Steps: 1. Select Price: Low to High dropdown option.			
Expected Result: Products sorted in strictly ascending price order.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-UI-001

ID: TC-UI-001	Title: Verify Dynamic Text Box Form Input Submission	Priority: P2 - Medium	Type: Functional UI
Target Link: https://demoqa.com/text-box			
Preconditions: Form ready.			
Test Execution Steps: 1. Enter Full Name: John Doe. 2. Enter Email: john@example.com. 3. Click Submit.			
Expected Result: Submitted values displayed in formatted output card below form.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-UI-002

ID: TC-UI-002	Title: Verify Checkbox Tree Selection & State Reflection	Priority: P2 - Medium	Type: Functional UI
Target Link: https://demoqa.com/checkbox			
Preconditions: Tree view open.			
Test Execution Steps: - Expand all nodes. - Check Desktop and Downloads checkboxes.			
Expected Result: Selection summary text updates showing all checked folder nodes.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-UI-003

ID: TC-UI-003	Title: Verify Web Table Row Filtering & Search Engine	Priority: P2 - Medium	Type: Functional UI
Target Link: https://demoqa.com/webtables			
Preconditions: Table populated.			
Test Execution Steps: 1. Type Cierra into search box.			
Expected Result: Grid filters down to exactly 1 matching row for Cierra.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-UI-004

ID: TC-UI-004	Title: Verify Mouse Double Click & Right Click Actions	Priority: P2 - Medium	Type: UI Events
Target Link: https://demoqa.com/buttons			
Preconditions: Buttons page open.			
Test Execution Steps: 1. Perform doubleClick() on button. 2. Perform contextClick() on button.			
Expected Result: Text triggers: You have done a double click & right click.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-UI-005

ID: TC-UI-005	Title: Verify Robust Locator Strategy for Dynamic IDs	Priority: P3 - Low	Type: Locators UI
Target Link: https://practice-automation.com/			
Preconditions: Page refreshed.			
Test Execution Steps: 1. Locate element with changing dynamic ID via relative XPath.			
Expected Result: Element selected successfully without relying on brittle dynamic IDs.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-UI-006

ID: TC-UI-006	Title: Verify Modal Popup Window Display & Closure	Priority: P2 - Medium	Type: UI Dialogs
Target Link: https://practice-automation.com/popups/			
Preconditions: Popups page open.			
Test Execution Steps: 1. Click Modal Popup button. 2. Verify body text. 3. Click Close.			
Expected Result: Modal opens centered over backdrop, then dismisses cleanly.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-API-001

ID: TC-API-001	Title: GET /brands - Verify Status 200 OK & Schema Keys	Priority: P1 - High	Type: REST API GET
Target Link: https://api.practicesoftwaretesting.com/brands			
Preconditions: API online.			
Test Execution Steps: 1. Send GET request to /brands. 2. Validate HTTP 200. 3. Check JSON keys.			
Expected Result: HTTP 200 OK returned. Each brand object contains id & name.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-API-002

ID: TC-API-002	Title: POST /login - Verify Auth Token Response Body	Priority: P1 - High	Type: REST API POST
Target Link: https://api.practicesoftwaretesting.com/users/login			
Preconditions: User registered.			
Test Execution Steps: 1. Send POST JSON body with valid email/password.			
Expected Result: HTTP 200 OK. access_token string present in response body.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-API-003

ID: TC-API-003	Title: POST /login - Verify 401 Unauthorized Response	Priority: P1 - High	Type: REST API Negative
Target Link: https://api.practicesoftwaretesting.com/users/login			
Preconditions: Endpoint active.			
Test Execution Steps: 1. Send POST JSON payload with incorrect password.			
Expected Result: HTTP 401 Unauthorized status returned with error payload.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-API-004

ID: TC-API-004	Title: GET /invoices - Verify Bearer Token Auth Chaining	Priority: P1 - High	Type: REST API Chain
Target Link: https://api.practicesoftwaretesting.com/invoices			
Preconditions: Token captured.			
Test Execution Steps: 1. Send GET without header. 2. Send GET with Authorization: Bearer token.			
Expected Result: First request fails 401. Second request succeeds HTTP 200 OK.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-API-005

ID: TC-API-005	Title: GET /invalid_route - Verify HTTP 404 Handling	Priority: P2 - Medium	Type: REST API Negative
Target Link: https://api.practicesoftwaretesting.com/invalid_route			
Preconditions: API active.			
Test Execution Steps: 1. Send GET request to nonexistent URI route.			
Expected Result: HTTP 404 Not Found status code returned.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-BUG-001

ID: TC-BUG-001	Title: Bug Hunt: Miscalculated Stated Discount Badge	Priority: P1 - High	Type: Bug Hunting
Target Link: https://academybugs.com/store/			
Preconditions: Store loaded.			
Test Execution Steps: 1. Inspect item marked \$100 -> \$80. 2. Check discount badge.			
Expected Result: Bug logged! Stated badge claims Save 50% instead of actual 20%.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Test Case Detail Specification — TC-BUG-002

ID: TC-BUG-002	Title: Bug Hunt: Broken Category Pagination Hyperlink	Priority: P2 - Medium	Type: Bug Hunting
Target Link: https://academybugs.com/find-bugs/			
Preconditions: Catalog open.			
Test Execution Steps: 1. Click Page 2 link in footer pagination.			
Expected Result: Bug logged! Link leads to broken 404 page error.			

Test Execution Log & Analysis Notes:
Executed via automated headless browser agent. Network response logs verified for zero console exceptions.

Examples of BugsTypes of BugsFind BugsReport Bugs?

Examples of Bugs

Discover some examples of real bugs and recreate them yourself.

>

Social share buttons don't work

Many websites have buttons for sharing information, but in this example those buttons don't work.

>

Send button returns an error page

Users should be able to send a message when clicking send, but in this example the button returns an error page.

>

Video player doesn't work

Video players should quickly buffer and play video files, but in this example some videos can't be played.

>

Articles show an error page

The articles should show appropriate content, but in this example clicking an article shows an error page.

>

Search button leads to an error

A search button should find appropriate results, but in this example clicking on it leads to an error page.

>

Booking a table doesn't work

The user should be able to book a table, but in this example the user cannot submit the booking form.

[Home](#) / Dynamically Loaded Page Elements

Dynamically Loaded Page Elements

It's common to see an action get triggered that returns a result dynamically. It does not rely on the page to reload or finish loading. The page automatically gets updated (e.g. hiding elements, showing elements, updating copy, etc) through the use of JavaScript.

There are two examples. One in which an element already exists on the page but it is not displayed. And another where the element is not on the page and gets added in.

- [Example 1: Element on page that is hidden](#)
- [Example 2: Element rendered after the fact](#)

JavaScript Delays

Home › JavaScript Delays

There will be times when you will need to wait for certain conditions or events as you write automated tests. For instance, you may need to wait for an element to contain a given text.

Try writing a test that clicks the *Start* button below and waits for the text “Liftoff!” to appear. See this example of [using a Selenium WebDriverWait](#) to achieve this.

Click the button below to see a countdown timer.

Start

Spinners

[Home](#) › Spinners

This page shows a spinner on page load.

In most cases spinner only last one to two seconds. However, they can last much longer depending on the the background process being executed which is causing the spinner to appear. Your network speed may also influence the frequency and duration of spinners.

Practice writing an automated test that checks that the spinner is no longer visible.

HINT: The class name that pertains to the hidden spinner is `spinner-hidden` !

Want to slow down the spinner!? Try using a custom network throttling profile that uses a download speed of 40 kbit/s or less.

Tables

[Home](#) > Tables

Have you ever needed to look up something in a table? That’s a trivial task for a human, but computers must be given step-by-step instructions to do the same.

Simple Table

Use the following example to learn [how to look up somethings in a table](#).

Item	Price
Oranges	\$3.99
Laptop	\$1200.00
Marbles	\$1.25

Sortable Table

You can use a technique called [pagination](#) to interact with more complicated tables such as this table that lists countries based on
